## SUMMARY

Tech Lead & Mobile Engineer with 4+ years of experience building Android and iOS apps, SDKs, and hardware-connected clinical systems across healthcare, government, industrial, and enterprise domains. Led 5+ engineers and shipped 5+ medical applications used across hospitals in Southeast Asia, supporting 10+ USB/BLE medical devices. Clear technical leader who mentors engineers and partners with product, design, firmware, and clients to ship reliable production systems.

## SKILLS

**Programming Languages:** Kotlin, Java, Swift, Dart, TypeScript, JavaScript, PHP, Python

**Mobile & Frameworks:** Android SDK, Jetpack Compose, Kotlin Multiplatform, SwiftUI, Flutter, React Native, Vue, Laravel

**Architecture & Delivery:** Clean Architecture, MVVM, MVP, TDD, OOP, Modularization, Reactive Programming, Dependency Injection, CI/CD, Jenkins, Firebase, GitHub, GitLab, CircleCI

## WORK EXPERIENCE

**Tech Lead, Software Team | Fischer's Medical Ventures - Singapore | February 2026 - Present**

- Led 5+ engineers across Mobile, Desktop, and Web platforms, delivering 5+ hardware-connected medical applications used across hospitals in Southeast Asia and supporting 10+ USB/BLE medical devices.
- Partnered with firmware teams and clients across 10+ integration cycles, translating clinical and hardware requirements into scalable system designs, production-ready workflows, and hospital-ready releases.
- Researched and proposed an offline-first architecture for clinical device applications, improving workflow continuity, sync recovery, and device reliability during unstable hospital network conditions.

**Mobile Engineer | Fischer's Medical Ventures - Singapore | January 2025 - January 2026**

- Delivered production mobile apps connected to 5+ USB/BLE medical devices, enabling live streaming, calibration, and remote control with resilient connections and fault-tolerant workflows used by clinicians.
- Built reusable modules across BLE GATT, real-time video, offline handling, retry flows, and on-device ML, accelerating hardware integration and production rollout across clinical device workflows.

**iOS Developer, Contract | Owlies - Indonesia | October 2025 - December 2025**

- Shipped end-to-end iOS features using Clean Architecture and MVVM in Swift, supported by unit and UI test suites to improve release confidence and reduce production regressions.
- Implemented Superwall Paywall end-to-end on iOS, including a 5-second delayed trial prompt that improved purchase intent and increased conversion by ~70%.

**Android Engineer Intern | Traveloka (Travel Activities Department) - Indonesia | February 2024 - June 2024**

- Refactored legacy modules and resolved production bugs in the Traveloka Android app with 50M+ downloads, improving responsiveness across device tiers and strengthening release stability.
- Delivered Android features using Clean MVVM/MVP in Kotlin and Java, increased unit/UI test coverage to 70%+, and researched Jetpack Compose adoption to improve UI performance and developer efficiency.

**Mobile Developer | Freelanxx.it - Indonesia | January 2022 - January 2024**

- Designed, built, and shipped 20+ mobile apps across education and retail using Kotlin/Java for Android and Flutter for cross-platform delivery.
- Led a 4-person team, ran Agile sprints, coordinated cross-functionally, and standardized CI/CD across GitHub, GitLab, and CircleCI.

## EDUCATION

**Informatics Engineering | Universitas Dian Nuswantoro - Semarang, Indonesia | 2021 - 2025 | GPA 3.83 / 4.00**

- Undergraduate Thesis: Development of an Android-Based QR Code Attendance Application with AES Encryption and Device Binding to Prevent Fraud.

## FEATURED PROJECTS

---

- [Digihealth Kiosk AI ATM - Desktop & Mobile](#) - Kotlin Multiplatform: connected to 10+ medical devices.
- [8xray App - Desktop & Mobile](#) - Kotlin Multiplatform: connected to X-ray panel detector via .so and .dll integrations.
- [PCR - Mobile](#) - Kotlin Multiplatform: connected to medical devices via BLE.
- [Stethoscope - Mobile](#) - Kotlin Multiplatform: connected to stethoscope hardware via BLE.
- [Traveloka Xperience Ticket Detail](#) - Android, Kotlin & Java: Traveloka Travel Activities project focused on ticket detail experiences.
- [Traveloka Cruise LP-SR](#) - Android, Kotlin & Java: Traveloka cruise landing and search-result mobile project.
- [Leech Open-Source SDK](#) - Android, Kotlin: Android downloader SDK.
- [Highlightor Android Open-Source SDK](#) - Jetpack Compose: reusable UI SDK project built with modern Android UI patterns.

## LEADERSHIP EXPERIENCE

---

### **Google Developer Student Club UDINUS** | GDSC Udinus - Indonesia | *August 2023 - July 2024*

- Head of Event Core Team; Android Development Speaker: Led 5+ tech events and bootcamps with 200+ attendees, and delivered Jetpack Compose workshops with live coding, hands-on labs, and open-source sample repositories.

### **Dinus Open-Source Community** | DOSCOM - Indonesia | *August 2022 - July 2024*

- Head of Human Resource Field; Android Development Mentor Lead: Managed 80+ community members across Programming, Multimedia, and Network divisions; trained mentors and taught Kotlin, OOP, and Android fundamentals across 3 vocational high schools.

## CERTIFICATIONS

---

Meta Android Developer Professional Certificate (2025) | Meta React Native (2025) | Traveloka Internship Certificate (2024) | Google Developer Student Club Core Team (2024)
